

Salient features of the interactive website to be developed and maintained under the SMDP-C2SD Programme

- The website should have user interface for all the RCs and PIs i.e. 60 login ID for updating the contents related to their project
- Disseminate information about the projects amongst the group.
- Repository for central information and IPs
- Administrative and Financial Monitoring
- Online submission of the information and requirement for the projects for development of working prototype of systems/ /sub-systems/ SoCs, design of ASICs and FPGA based board level design
- Provide a platform for capturing essential parameters for the India Chip Programme
- Provide a platform for discussion amongst the groups for knowledge sharing.
- Availability of video tutorial for usage of software/ fabrication /technology libraries.
- Flow chart for VLSI design front to backend for chip fabrication
- Usage of social sites for developing better industrial linkages.
- Upload material of IEPs, workshops, papers published under the programme etc.
- Facilitate Networked PhD Programme
